

## TRINITY™ 9000 Series

### Never Adjust Your Door Again

#### Introducing Trinity by Norton® –The world's most intelligent door closer Patent Pending

While Trinity looks and acts like a door closer, it is actually a new member of your facility maintenance team. Powered by an onboard generator, the automatic valve monitors and adapts continually to changes in environmental conditions, making trips to the door for adjustments a thing of the past. Simply install Trinity, adjust and walk away.

#### Benefits

- **Energy savings:** Consistent and predictable closing contributes to energy efficiency and utility cost savings by eliminating heat/cooling loss.
- **Increased security:** Self adjusting mechanism ensures doors consistently close.
- **Operational efficiency:** Ability to adapt to environmental fluctuations eliminates readjustments by maintenance staff, reducing building management costs and freeing resources for other tasks.
- **Off-the-grid:** No wiring required; all power provided by built-in generator.

#### Applications:

- Hospitals
- Schools or Universities
- Office Buildings
- Auditoriums

#### Certifications

- UL228 certified
- UL10c certified
- Meets ADA requirements

#### Warranty

- 10-year limited manufacturer's warranty (control module and motor)
- Lifetime manufacturer's warranty (door closer body only)

#### Multi-sized spring:

- Allows closer to be adjusted from size 1 (A.D.A.) to size 6

#### Fits 7500/7700 footprint:

- Retrofits existing applications.

#### Automatic valve:

- Adapts to changing conditions
- Controls backcheck, sweep, and latch speeds.

#### Onboard generator:

- Supplies power for electric sensing and automatic valve
