KEY RINGS, CLIPS, TAGS, HIDERS

**KEY RINGS**

**KSI  
 KEY SYSTEMS, INC**

Each ring has its own unique serial number.

Order #	Item #	Size	Price
442-0040	279	1 inch (3cm)	<b>\$7.13</b>
442-0050	278	1-5/8 inch (4cm)	<b>\$7.13</b>
442-0060	270	2 inches (5cm)	<b>\$8.48</b>

**Tamper Proof Key Rings®**

- Prevent Key Removal
- Not Resealable if Opened
- Replaces Welded Rings
- Serialized to Identify Rings & Prevent Substitutions
- 4mm Stainless Steel

Seal key rings in seconds and prevent undetected key removals or substitutions. If forced open, the seal is destroyed showing that the ring has been tampered with. A serialized number on each ring prevents ring substitution. The 4mm diameter ring and seal permits smooth movement of keys around the ring. Save time with portable tools that go to the job site. Eliminate the costly practice of welding or brazing key rings which can be resealed without detection and make a ring brittle and subject to breaking.

**Tamper Proof Key Ring Tools**

**Ring Crimping Tool. 271D**

Squeezes the connection where the two ends meet creating a permanent seal. The gold crimper's black handle lifts to reveal three small rollers with rounded ridges that squeeze the connection where the two ends of the ring meet, creating a permanent seal.

Order #	Item #	Tool	Price
442-0010	271D	Crimping	<b>\$172.50</b>

**Ring Closing Tool. 271V**

Closes any size ring in preparation for crimping. The closing tool's black body has five shallow grooves and one deep trench. At its tip is a small black knob used to adjust the tension on the silver swing arm that pulls the ring closed and locks it in place.

442-0020	271V	Closing	<b>\$63.93</b>

**MORSE WATCHMANS**

**Morse Watchmans**

**KEY-RINGS™ TAMPER-PROOF KEY RING DEVICES**

Morse Watchmans' Key-Rings is the simplest way to ensure peace of mind. Key-Rings is the "no tools needed," economical choice for the demanding security professional.

Using only your hand, an easy close-and-lock system requires only the power of your hand to seal it shut. Key-Rings boast an exclusive tamper-proof design which ensures keys cannot be removed. They're constructed from 5/32" of high quality, stainless steel. The only way a perpetrator can get the keys off the Key-Rings is to use a hacksaw or some other extreme cutting measure.

Available in different ring size diameters for a varying amount of keys. It's the perfect replacement for unreliable welded rings. Key-Rings all have colored sealing hubs that lock the key ring firmly in place. The hubs come in six different colors for security and departmental coding purposes. The hubs can be replaced, allowing Key-Rings to be reused.

To prevent substitutions, the serialized hubs have unique identification numbers. Not sure which Key-Rings that you are looking for? Just read the ID number on its hub and you'll know! Key-Rings is a smart and cost-effective choice for anyone who needs to keep his or her keys safe and secure. Morse Watchmans offers a one-year warranty on Key-Rings, so your satisfaction is completely guaranteed!
