HIGH SECURITY

CX-5 High Security Cylinders

Features:

- The CX-5 system is suitable for use on all doors in houses, public and commercial buildings, hotels, hospitals and schools.
- Key Control: CX-5 series keyway is of proprietary design and the distribution of the key blanks is strictly controlled. Card Control with authorized signature is required in order to permit key duplication. CX-5 series cylinders provide similar levels of key control at a fraction of the cost when compared to other high security key control systems.
- Pick Resistant: CX-5 cylinders are equipped with anti-picking side pins and mushroom top pins to make it almost impossible to pick.
- Drill Resistance: CX-5 cylinders are equipped with hardened steel pins which are situated in the cylinder face, this gives it a high resistance to drilling for protection of the top chamber and the sidebar.
- Key Duplication: Keys can be cut on any standard duplicating and code cutting machines.
- CX-5 key-in-knob (KIK) cylinders retrofit all Scorpion cylindrical locksets and most popular brand names.
 - * Patented Cylinder
 - * Patent Pending Key

Materials:

- Solid brass construction
- Key blank silver nickel
- Top and Bottom Pins Brass material
- Side Pin and Side Bar Silver Nickel

Combo Mortise/Rim Cylinders

1-1/8" Mortise & Rim Cylinder combination means less stock to keep in inventory. Also includes spacer ring and spring so you don't need to stock 1" cylinders either! Provides a high security to any exit device or any mortise lockset.

Key Control • Pick Resistant • Drill Resistant

Includes: Tail piece for Rim cylinder, cam A & B, and a Steel Ring and Spring.

Cylinders: 1-1/8" Mortise/Rim Combo.

6-pin, 0-Bitted, 2 keys, ZPL Keyway
